Survey of examination and care-giving phases

In accordance with Section 30 of the Lower Saxony Higher Education Act (NHG), prerequisites for employment as a junior professor include a university degree, pedagogical-didactic aptitude and a particular ability to conduct in-depth, independent scientific work, which is typically demonstrated by an outstanding dissertation. In the arts, special artistic abilities must be demonstrated.

Section 30 paragraph 5 NHG stipulates that no more than four years (nine years in the field of medicine) may elapse between the final doctoral examination, or other achievements proving a particular ability for in-depth, independent scientific work, and the application for a junior professorship. If, during this time period, the applicant looked after one or several children under the age of 18 or a family member in need of care, the period is extended by two years per child or long-term care case. Multiple extensions may not add up to more than four years in total.

In addition to your application documents, please list the following time periods in full, if applicable:

1. Examination phase¹

If applicable, please check or fill in

Last examination on	Type of examination
---------------------	---------------------

2. Care-giving phases that may have led to an extension of the maximum preparation time

Caring for children under the age of 18	
Child's last name, first name	Child's date of birth
Child's last name, first name	Child's date of birth

Caring for a family member	
Last name, first name of individual cared for	Duration (from-to)
Last name, first name of individual cared for	Duration (from-to)

By signing this document, I certify that the information provided above is correct.

Date, signature (applicant)

¹ A doctorate is to be considered complete at the time of the final examination, e.g. the date of the oral exam. However, the requirements of the respective doctoral regulations apply.
