

Dear sustainability enthusiasts,

welcome to the 4th edition of this newsletter published in the context of the climate protection project. Here, we report in more or less periodical intervals about the progress of the project and other news from the sustainability cosmos of the university. Please recommend us any time.

### Measure workshops

On June 15, and from June 22-24, seven workshops in total take place. Here, we want to collect and discuss solutions and action measured for the different fields of action for the climate protection concept. Topics are building energy, mobility, handling of resources, ecological design of the campus, integration of science, studies and teaching, and and and. If you're interested and have time for one of these topics, you are kindly invited to sign up in the respective stud.IP section. We would be so happy to have you there. All links and further information can be found in the Intranet, namely [here](#).

### Music and Climate

In the context of the seminar "Music and climate" led by Volker Schindel, students assessed a musical dealing with the climate crisis. The result – a short movie with self-produced music – can be watched [here](#).

### Vor uns die Sintflut

Welchen Umgang fordert die Klimakrise? Diese Frage stellt auch das Studierenden-Theater OUT in dem Stück Vor uns die Sintflut. Es ist im Juni an ausgewählten Terminen u.a. im Gleispark zu sehen, genauer am 17., 18., 26. und 27. Juni. Das Projekt ist auch gefördert vom Fachdienst Klimaschutz der Stadt Oldenburg. Der Eintritt ist frei, es gibt also keine Ausrede, es sich nicht anzusehen. Weitere Infos gibt es [hier](#).

We are ongoingly happy to hear your ideas, suggestions and wished – please feel free to write us anytime.

It would be so great, if you forward this newsletter to your colleagues or recommend signing up to it.

Thank you so much for your support of the project, it's not possible without it.
